12 in. Sub Surface Air Diffuser Item #AIRDIF

- 6000 1mm micro-pores
- High flow diffusers create less work on compressor
- Fully weighted base so that the diffuser will land up-right on the lake bottom
- Accepts 3/8- 5/8 in. standard 1/2 in. female thread barbs
- Durable and self-cleaning EPDM membrane
- Limited 5 year warranty

Key Feature:

The Sub Surface Air Diffuser has over 6,000 micro-pores which creates very small bubbles. The smaller the bubbles the more surface area the air has to come in contact with the water. This leads to a greater oxygen transfer rate and less back pressure on the system.
